INTERDEPARTMENTAL COMMUNICATION

DATE: April 16, 1973

TO: Mr. W. N. Gettel

LOCATION: Tigard

FROM: E. R. Gerschefske

LOCATION: North Kansas City

SUBJECT: Asbestos Free All Purpose Trial

On subsequent checks with the application; and an additional separate trial, the material continued to be quite satisfactory overall.

The main complaint was that it was difficult to mix. I feel that part of this may have been due to very cool water. They were satisfied with plasticity and general workability; and felt too that shrinkage was reasonable.

I have not been able to get them to commit themselves to going back to a central mix operation with this product. They said that they would have to try a good bit more of it than they were able to on this test and too that price, naturally, would have a great deal to do with their decision.
