ADVISORY CENTER ON TOXICOLOGY

12 September 1966

Dr. Robert A. Kehoe
Kettering Laboratory in the
Department of Preventive Medicine
and Industrial Health
College of Medicine
University of Cincinnati
Cincinnati, Ohio

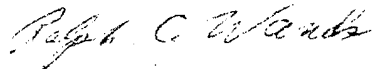

Dear Dr. Kehoe:

We are very appreciative for your letter of August 30 regarding the toxicity of cyclopentadienyl manganese tricarbonyl. I can certainly understand how the normally smooth functioning of the Kettering Laboratory has been disrupted by events in the last two years which were completely beyond anyone's control such as the sudden and unfortunate loss of Dr. Princi.

Your summary remarks on the toxicity of this compound will be quite adequate for the moment and we will look forward to a more detailed report when you are able to make it available.

I, also, want to take this opportunity to congratulate you, albeit belatedly, on your testimony to Senator Muskie in June. I attended those hearings and formed an impression that the Senator is not an easy man with whom to cope.

Sincerely yours,

Ralph C. Wands
Director
