Monsanto Company
800 North Lindbergh Boulevard, B3NA
St. Louis, Missouri 63141

Dear Dr. Craddock:

Thank you for taking the time to meet with Mr. Elmer Jenkins and myself yesterday, regarding Polychlorinated Biphenyls (PCB). Your being able to share with us your practical and analytic knowledge of PCB has given us the direction to follow in satisfying our concerns relative to PCB.

I will be contacting the National Electrical Manufacturers Association to obtain a copy of the Drill Friese Report on PCB. You indicated that possibly your office could forward to me a copy of the Brown and Jones NIOSH Study and, if so, please enclose your statement for duplication.

In addition, I would ask that you enclose the name of your Corporate Medical Director, so that I can contact him regarding some physicians who have experience in examining employees exposed to PCB, should we elect to examine our employees.

Again, I wish to thank you for your time and help in satisfying our questions concerning PCB.

Very truly yours,

FREEMAN UNITED COAL MINING COMPANY

Richard W. Lustig
