19 - AIR MAIL

Mr. C. L. Risso-Gill,
The Associated Ethyl Company Limited,
Avda. Pte. Poque Saenz Pena, 710,
Buenos Aires,
Argentina.

Dear Charlie:

I have other letters of yours to be answered and I shall get to them shortly. I have been so swamped of late that it has been impossible to attend to current correspondence. However, I have just received bills from The Williams and Wilkins Company to cover the subscriptions of Dr. Cruz Coke and Dr. Schiaffino to the Journal of Industrial Hygiene and Toxicology. These subscriptions were authorized at the expense of Associated Ethyl some two or three years ago, but I am not certain that you wish to have them continued indefinitely. It is not a large item of expense, and in order that there might not be a lapse that would result in a loss of certain copies, I have continued the subscriptions for another year, and will handle the account in the usual fashion through the New York office.

At your convenience I should be glad to have your recommendation on whether these should be continued beyond the current year.

I was very glad to have your account of the meeting at Aruba on the subject of tank cleaning. We have collected a considerable mass of data in connection with tank cleaning activities on tanker vessels, barges, and the like, but it has not been put together as yet and perhaps will not be for a while longer. Present indications are that no special hazards have come to light as the consequence of these observations, but I shall acquaint you with the situation in a more satisfactory manner a little later. Meanwhile I am glad of the position that was taken at Lago, since it seems to be a very intelligent and satisfactory one.

Your letter enclosing certain reports from Dr. Bortone was not answered earlier, largely because I did not consider that the situation justified any haste on my part. The conditions reported in the men were of a type that are likely to occur quite frequently in otherwise substantially normal individuals.

Mr. C. L. Risso-Gill - (2) - November 1, 1944

If we were to exclude men from employment because of the presence of intestinal parasites, because of moderate anemias or dental caries, I am afraid we would be quite unable to fill the job. On this account I have not considered it necessary to write Dr. Bortone.

It has been good to hear from you from time to time, and I hope you will drop us a line again. Lucile asked me to forward her best regards to you when I wrote and to tell you that we would be glad to see you any time you could pay us a visit. My impression is that she would very much like to have good reason to return to South America, especially now that the winter is coming on. I fear that will have to be postponed until some later day, but perhaps you can get some idea of how pleased we both were with our South American tour in your company.

Sincerely yours,

Robert A. Kehoe, M. D.
