STV

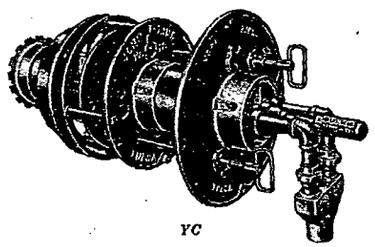

VR

SERIES STV GAS BURNER

Ideal for heating boiler installations. From one head to fifty heads. Quiet, efficient and economical operation. Write for literature.

SERIES VR VERTICAL GAS BURNER

This burner is of the "upshot" or vertical radiant type with multiple burner heads so designed as to entrain a certain amount of primary air from the total air entering through the louvre. The "VR" burners are especially designed to operate in boilers having low draft and small combustion space. Write for literature.

YC

SERIES YC COMBINATION GAS AND OIL BURNER

The John Zink Series YC Combination Gas and Oil Burner is recommended for boilers and process furnaces where maximum heat release at low excess air and high heat density is required. Features of the Series YC are Rugged Weather-Proof Construction; Easy to Remove Fuel Guns; Lightweight Fuel Guns; Burn Any Commercial Fuel Oil; Burn Any Gas at Reasonable Pressure; Draft—Natural, Forced or Induced; Center Firing of Both Fuels; Will Operate with Either Fuel as well as in Combination; Can Be Equipped With Any Standard Type Controls.

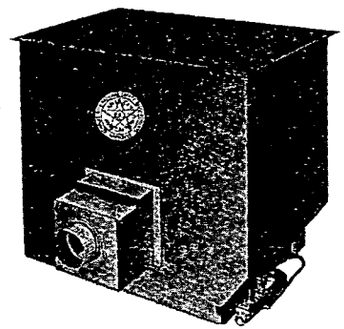

Also: SMOKELESS FIELD FLARE BURNERS
