Mr. John T. Cantlon
Consulting Actuary
40 W. Third Avenue
Columbus 1, Ohio

Dear John:

I am enclosing a News Item about Beryllium which illustrates the point I mentioned in my previous letter to you.

Here, although acknowledging the highly toxic nature of the product, Donaldson (whom I know) shows that it can be handled and used safely, because the control features in terms of concentrations and experience have been determined, and therefore the Company is able to sell and promote its products. This of course has now occurred after a number of years of preparation.

For the asbestos companies, there is little time to lose, in order to get into the same position.

Personal regards,

Tom
