JOHN T. LEWIS & BROS. CO.
 SUBSIDIARY OF NATIONAL LEAD COMPANY
 PHILADELPHIA, PA.

SUBJECT ARTHUR PEW'S FARM, LOCATION UNKNOWN
DATE November 16th, 1949
TO Mr. J.W. Gardiner, Jr., President
FROM A.E. McCarron, Sales Manager
IN REPLY TO

Mr. John Pruss of Pruss & Bradley is doing a painting job on the interior of a building on the above farm. It seems that the owners bought some of our 111 - Tinting White and used it on the building and their prize cattle were allowed around the paint before it had thoroughly dried and contacted colic or lead poisoning. Mr. Pruss asked me if our 111 - Tinting White had lead in the same, I told him it did. Due to the condition, I suggested that they coat the areas over with our 210 - White Sash and Trim which contains no lead, and therefore, could not produce lead poisoning.

This is just made for reference.

A.E. McCarron
