Articles Reviewed:

Anon. 1944. Prevention of pneumoconiosis. Chem. Age.
“Pneumoconiosis is a group name for all lung disease caused by dust particles; two forms of it are silicosis and asbestosis. The best methods of prevention are (1) replacement of the substance...by are harmless one...(2) prevention of the escape of dust into the workplace atmosphere, usually by means of hoods and air suction; (3) the use of respirators by all workers..., and (4) copious general ventilation...”
