SUBJECT PYDRAUL PRECAUTIONARY LABELING

Due to recent changes in the labeling laws of several states it is necessary to include precautionary information on many product packages. The Pydrauls are included in this category.

The wording of the label is specified by the states and is written to cover a wide class of products, therefore, appearing more severe than necessary for other products in the class.

Starting immediately the following statement will appear on all containers of Pydraul 150, Pydraul F-9, Pydraul A-200, Pydraul 625 and Pydraul AC:

CAUTION! CONTAINS CHLORINATED HYDROCARBONS

Avoid prolonged breathing of vapors or mists.
Avoid contact with eyes or prolonged contact with skin.
If skin contact occurs, remove by washing with soap and water. Following eye contact flush with water.
If clothing becomes soaked with fluid, launder before wearing again.

Most of your customers will not be concerned if this recent change in state legislation is explained to them and they expect to see the label on Pydraul containers. They may be quite concerned, however, if they see the label without prior explanation.

Will you please inform all of your customers about this precautionary labeling.
