PU - labelling

Dear Wayne:

As we discussed, it is Vista's position that our PVC Compound products are not hazardous as defined by the OSHA Hazard Communication Standard (29 CFR 1910.1200). Therefore, containers of PVC Compound are not required to be labeled.

Under the standard, a product is considered to be hazardous if it exhibits a physical or health hazard. A material is a physical hazard if it is a combustible liquid, flammable liquid or solid, compressed gas, explosive, organic peroxide, oxidizer, pyrophoric, reactive or water reactive. PVC Compound exhibits none of these characteristics.

A material presents a health hazard if statistically significant data from a study done in accordance with established scientific protocol indicates an effect may occur in exposed populations. Vista is not aware of any such studies for PVC Compound.

Although PVC Compound may contain hazardous materials, as additives, such as lead, the important issue is whether handling the product (compound) under normal conditions of use could create an exposure. Vista's experience in our manufacturing plant is that there is no significant exposure to compound additives when handling the actual compound product.

Per your request, I have enclosed a Material Safety Data Sheet specifically for Vista 38611 Compound. Please call me at 713/531-3445 if you have further questions on this issue.

Sincerely,

Thomas G. Grumbles, C.I.H.
Environmental Quality Manager

SUBJ: EOIC DUES COMMITMENT: JUSTIFICATION FOR EXCEEDING
BUDGETED AMOUNT

VISTA

Attached is the request for payment of 1987 dues for our EOIC membership. The request is for \$8,000. The budget amount approved was \$5,000. The \$5,000 was a best estimate by CMA staff at the time we needed our budget figures. The EOIC Board did not make a final decision on the budget until November as the EOIC budget year runs from January to January.

The increase over the estimated amount was due to an unexpected increase in regulatory activity timing, specifically regarding EPA hazardous air pollutant designation and the OSHA short-term exposure limit rulemaking activity. Additional funds will be needed to support EOIC activities in those areas.

Please forward the attached forms and this letter to Larry Gallmore for payment.

Ethylene Oxide Industry Council

1987 Membership Commitment

Membership Status

Check One:

_____ Producer, Fee based on 1985 U.S. Nameplate capacity
(please fill out confidential enclosure)

_____ Non-producer Ethoxylator

_____ Consuming less than 15 M pounds - \$4,000

X _____ Consuming more than 15 M pounds - \$8,000

_____ Health Product Manufacturer

_____ Less than \$50 million in annual sales - \$1,300

_____ More than \$50 million in annual sales - \$3,500

_____ Health Provider (includes food sterilization and minor
uses) - \$250

_____ Trade Association (no dues)

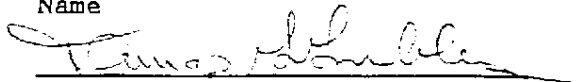

☐ - Check is enclosed

☐ - Please invoice my company

My company commits funds to the EOIC according to the membership
status indicated above and under the Board-approved constraints
recommended by the Finance Committee.
