MEMORANDUM FOR MR. J. W. STEVENS
BUREAU OF CHEMISTRY & SOILS

Dear Mr. Stevens:

Reference is made to your letter of June 14, 1934, regarding Item 52-T-15640-c, white lead. We have been informed by the Procurement Division, under date of July 2, that this item is covered by Federal Specifications No. TT-W-251, white lead, basic carbonate, in the dry form, paste in oil and semi-paste in oil. The Procurement Division also states:

"You will please note that the General Schedule of Supplies lists various items under "Pigments," dry, in japan and in oil, and this item falls under the classification, dry pigment.

"The Mamolinth Carbon Paint Company under their contract, is required to supply only white lead in the dry form and only that part of the Federal Specification pertaining to dry white lead applies in this case."

We hope that this clears up the matter to your satisfaction.

Very truly yours,

CME

Chief of Division
