D. P. R. Smythe - Asbestos, P. Q.

FLINTKOTE COMPANY - TORONTO

This customer uses substantial quantities of asbestos at their Toronto and Montreal plants, and today we received a call from their Plant Engineer, Mr. E. L. Phillips. He was interested in receiving any information we could provide on environmental control as it relates to asbestos use and in particular packaging, bulk handling, dust control and any other information relating to plant hygiene.

They have no particular problems at either of these plants at the present time. However, he wishes to keep up to date on any current developments with the handling and control of dust relating to asbestos usage, and therefore information of a general nature is requested at this time.

Would you be kind enough to send some general information along these lines to the attention of Mr. E. L. Phillips, Flintkote Company of Canada, P. O. Box 160, Postal Station N, Toronto 19, Ontario.

M. W. Blackhurst.
