SUBJ: OSHA Asbestos Standard Medical Surveillance

Enclosed please find a letter that should either be distributed or placed on your bulletin boards informing all employees of the changes in the medical monitoring program as a result of the new OSHA asbestos standard.

In addition, there is a letter introducing the medical monitoring program to examining physicians and should be sent to the designated physician who will be performing the examination for CPD locally.

Finally, enclosed are pre-placement questionnaires, periodic questionnaires and forms for reporting the results of these examinations which should also be given to the examining physicians. These are the only forms that are acceptable under the OSHA health surveillance requirement.

If you need additional copies of these forms, please contact our office in Cambridge.

Jerry H. Berke, M.D., M.P.H.
Medical & Toxicology Director
