DOCUMENT DESCRIPTION: Letter

(116)

Total Fortescue,
Wittenoom...W.A.,
29th October 194[illegible]

Dear Dr. Lehultz,

Thank you for your letter of 25th October. I have finished the [illegible] and I [illegible] two miles in the hill. I expect to be finished in about a fortnight to [illegible] will keep in touch. This is a very much bigger job than I had thought and I could work here for months not weeks but I will have some worthwhile results. There are some very quaint ideas of industrial hygiene here and the whole place could do with a shake up. Please do not mention this is anyone other than, say, Dr. Letham because I do not want the estimations I must make on my return pre-judged but there are a number of things that do not need dust sampling to point up the faults. The mine ventilation is known to be bad (Mr. Brisbane even knows it) and some of the mill practices are ludicrous in the extreme.

Kind regards,

Yours sincerely,

G. Major.
