Joel,

Attached are all of the MSDS sheets. Ansul and Chemguard had a different MSDS for each size container.

Steven,

Based on our phone conversation, I will proceed to create 6 NSNs. Excel sheet attached.

Please provide the missing information and clarify the discrepancy for Arctic 3% MIL-SPEC AFFF part numbers (see manufacturer attachment).

Thanks a lot.

Subject: RE: New NSNs for AFFF

Joel,

No, we only need 6 new NSNs.

For 3% AFFF, we need one for a 5 gallon can, a 55 gallon drum, and a 265 gallon tote.

For 6%, we need the same three sizes.

I gave you the product names because Joe told me that the product names and product numbers needed to be associated with the NSNs in the system.

Good afternoon Steven,

Thank you for your quick response. No problem. I will proceed to create a project to generate 24 NSNs for the AFFs. After I did my research I notice there's a discrepancy with Arctic 3% MIL-SPEC AFFF part numbers. Please validate. See attached

Also, please provide the following information:

1. SDS for Arctic 3% MIL-SPEC AFFF, Arctic 6% MIL-SPEC AFFF, Phos-Chek 3% AFFF MS and Fireade 2000-MIL6 AFFF
2. Part number and tech data from manufacturer for Phos-Chek 3% AFFF MS and Fireade 2000-MIL6 AFFF
3. Price for all items

Thanks

Joel,

All 24 Part numbers are applicable to my request. I will be adding 6 more part numbers to this list in a few weeks when two new products are qualified. I don't have the MSDS sheets, but I will start gathering them if you need them.

Good afternoon Steven,

I'm the provisioner that's going to generate/create the new NSNs for you. But first I have a couple of questions. From the 24 different part numbers, how many are applicable to your request? Please specify the part number. Do you have the Safety Data Sheets for those products?

If you have any question please let me know.

Thank you very much.

Subject: RE: New NSNs for AFFF

Joe,

Thank you for getting back to me. The current NSNs are:

- 4210-01-144-0291: 55 Gallon Drums, 3% Concentrate
- 4210-01-139-4972: 5 Gallon Pail, 3% Concentrate
- 4210-01-056-8343: 5 Gallon Pail, 6% Concentrate
- 4210-01-056-0883: 55 Gallon Drums, 6% Concentrate

As I said on the phone, in addition to the items listed above with current NSNs, we would like to add two more:

- 265 Gallon Tote, 3% Concentrate
- 265 Gallon Tote, 6% Concentrate

Right now, the title for those products is, "FOAM LIQUID, FIRE EXTINGUISHING". We will add wording to the end that indicates that it is the new environmentally friendly version.

Steve;

There are no forms that I am aware of. No there is no way they can be created faster, at least that is what the ILS group has always said....

Dave

Dave,

Send me the info and/or forms. We are getting pressure from ASN to create new NSNs. Is there anyway that they can be created faster than 6 months?

Steve;

Our logistic group up here can get them created. They require drawings and or detailed item descriptions, manufacturers and funding. It also takes about 6 months.

Dave

Dave,

I was told you are the person that knows how to create new NSNs. I need to create 6 new NSNs for Milspec AFFF. This will allow the new C6 AFFF to be differentiated from the old C8 AFFF. Can you tell me how to do this?
