Subject: C8 At Dry Run

Attached are results for various water samples taken at the Dry Run Landfill. The numbers refer to various stream sampling locations noted on my hand-drawn map. I asked Jim Yoak to take these samples because I was concerned about C8 leaching out of the material taken out of the Teflon* supernate pond sites. Since some of these results are nonzero, we may want to do some additional testing.

Subject: Dry Run C8 Analyses

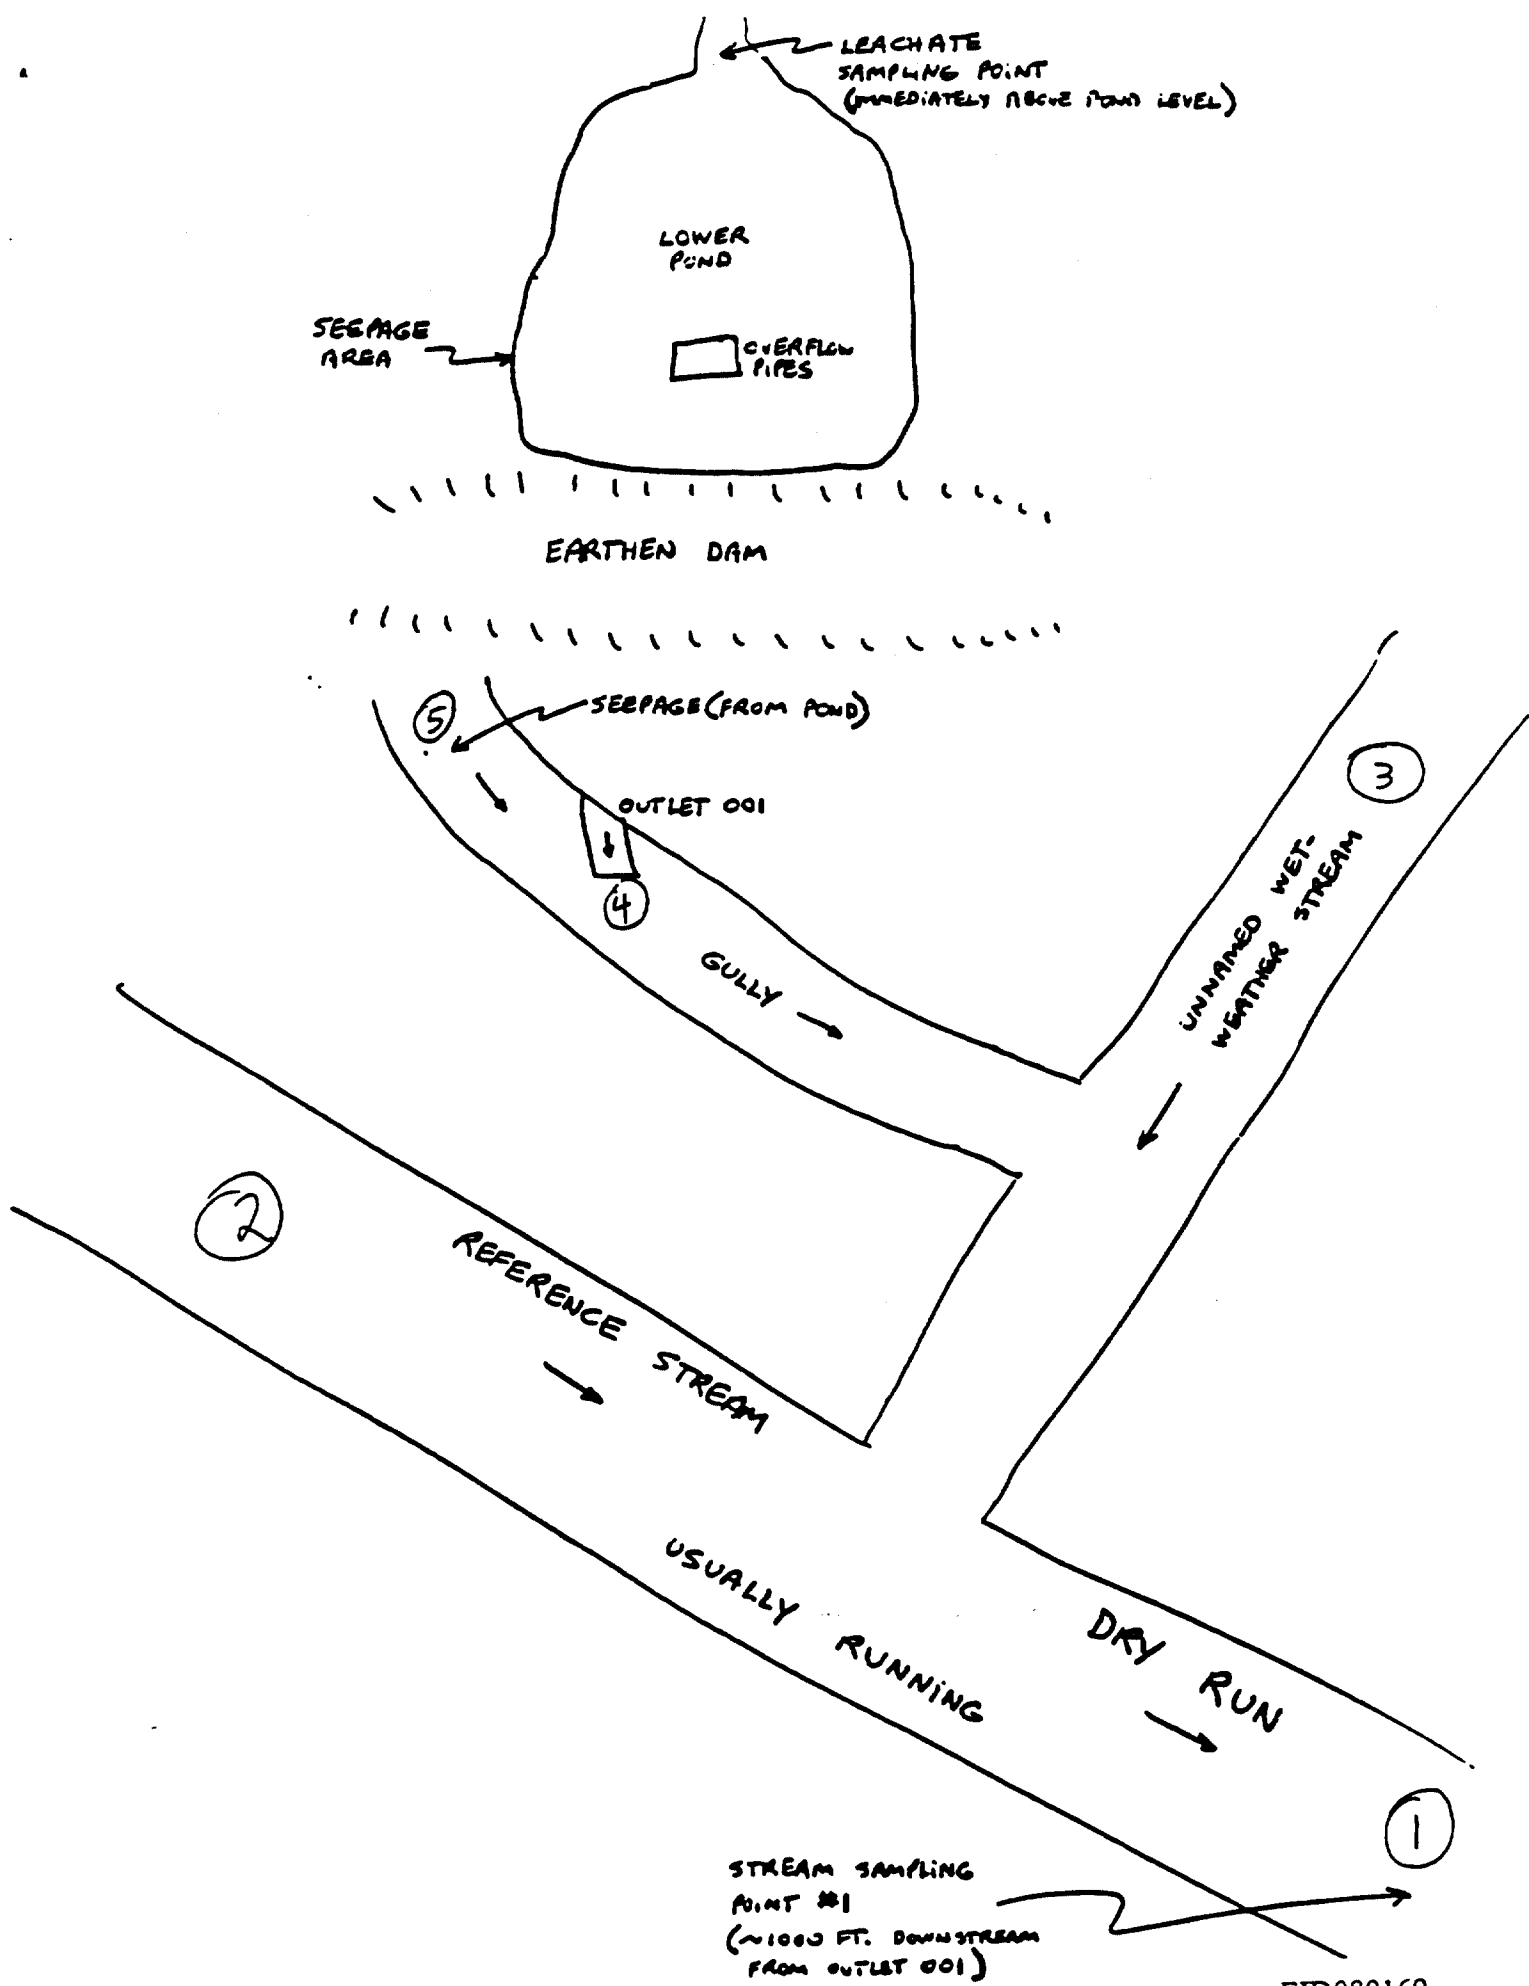

Here are the results:

<u>Sample</u>	<u>ppm C8</u>
D.R.#1	1.6
D.R.#2	0.0
D.R.#3	0.0
D.R.#4	0.6
D.R.#5	0.4

These values were calculated from the area of the peaks.
