Patent Committee Meeting

The Patent Committee meeting scheduled for January 20, 1965, has been cancelled. Revision of the schedule and system of review of invention disclosures from the various company departments and locations is in progress with a view to reducing the number of, or even eliminating meetings of the full committee. The committee organization will be retained, but members will be called upon primarily only to review the invention disclosures of their own groups. This will reduce the number of meetings for most committee members, probably to two to four meetings per year, and will permit consideration of each invention disclosure in greater depth. Minutes of all meetings will be circulated to the full committee, as at present.

Further information will be supplied by a notice to be issued in the near future.
