Subject: [■■■■■] CCIEP PFAS group - Update on REACH restriction procedures

Dear Colleagues of the CCIEP PFAS group,

We would like to draw your attention to the current state of the planned PFAS restriction dossiers under REACH:

- The submission of the general restriction dossier on all PFAS is being postponed to the 13th of January 2023 ([Registry of restriction intentions until outcome - ECHA \(europa.eu\)](#)).
- The restriction dossier proposal on PFAS in fire-fighting foams has been submitted to the scientific committees of RAC and SEAC for conformity check and is planned to be published on the ECHA website by the end of February ([Registry of restriction intentions until outcome - ECHA \(europa.eu\)](#)).

Don't hesitate to come back to me with further questions.

Kind regards,

■■■■■ ■■■■
