Cole,

First off, THANK YOU for stepping up and cleaning up the government. I'm reaching out to introduce Workforce AI—a next-generation platform designed to help government agencies dramatically improve efficiency and productivity.

Our solution features a Human User Interface (HUI) with highly realistic humanlike video avatars that make it simple for non-technical government employees to interact with AI. Unlike traditional systems, our digital employees:

- **Enhance Usability:** With natural lip movements, real-time visual cues, and a conversational interface, they're as intuitive as speaking with a colleague.
- **Drive Efficiency:** They're engineered to automate repetitive administrative tasks, freeing government workers to focus on strategic, high-value work (or being eliminated outright).
- **Enable Transformation:** Our vision is to empower agencies to redeploy staff from routine tasks to critical decision-making and public service improvement. The typical, non-technical government worker is not getting the power of AI on a daily basis and will not be ever able to use complicated tools. We solve that.

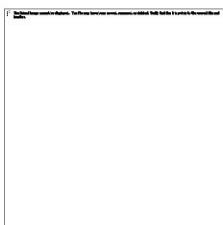

Workforce AI will help DOGE reduce operational waste and accelerate efficiency—allowing government workers to be retrained for more meaningful and productive roles or be eliminated.

I'd welcome the opportunity to discuss how our platform can be customized to meet the needs of DOGE. When can we connect for a brief call? Or I'm happy to come to DC as I have friends there who work in the government.

Thank you for your time and consideration.

Curious about tomorrow's workforce? Watch 8 digital 'Marios' join me on video to get stuff done. Check out our launch post here: <https://x.com/mariocostanz/status/1880678319810826645>

Sincere regards,

Mario Costanz
