Name in PAINTS

TERMS

60 days Net; 2% for cash within 10 days from date of invoice; on Paints, Varnishes, Lacquers, Synthetics, Coal Tar Products, Lucasoap, White and Red Lead and Brushes.

30 days Net; 1% discount for cash within 10 days from date of invoice; Linseed Oil, Turpentine, Alcohol, Dry Colors, Insecticides and goods not of our manufacture.

STOCK ORDER TERMS

Stock orders booked for shipments between November 1st and the following April 1st are subject to terms of: 60 days from April 1st Net; 2% for cash paid on or before April 10th. Opening stock orders to new trade sales customers are subject to four months dating; 2% 10 days after the four month period; 60 days Net. No spring stock order to a regular dealer, jobber or distributor shall be less than a minimum of \$150.00, with the exception of brushes.

NOTES ON ORDERING

Packing Pointers. On page 4 we give the quantities of each size can of all our products that are packed in each case, together with gross weight of same.

Our Products are sold by the United States Standard Measure and net weight.

Our Cans. Mixed paints, enamels, stains and certain varnishes are put up in easy-to-close, friction-top cans in the household sizes, which include quarter-pints and half-pints, and the gallon and half-gallon sizes of most of the varnishes in friction top cans; most varnishes in square-panel, nozzle-top cans.

All Claims must be made within 10 days from date of invoice; otherwise they are not considered.

Always give P. O. address and shipping directions, naming the delivering railroad.

Specify whether colors are required dry, in oil, or in Japan, naming quality and brand, or on mixed paint specify brand, shade and number.

French Ochre, Whiting and Lamp Black barrels charged at cost and will not be repacked.

No Charge for original packages except where specified. All imported goods are charged invoice weights.

Empty Packages charged when containing certain liquids will be redeemed at original price, less freight charges, if received in good order.

To Insure Prompt Attention, all orders should be addressed to the firm or its local representatives.

INDUSTRIAL FINISHES
AND CHEMICALLY DRY COLORS

In addition to the Trade Sales Items listed in this Price List, John Lucas & Co. manufactures a complete line of Industrial Finishing Specialties and Chemically Dry Colors. Unequaled Dry Colors are made by the most approved processes, under supervision. They are uniform, strong and true to tone. As we manufacture them primarily for use in manufacturing our own paints, stains and enamels, we are confident they will meet the most exacting requirements.

John Lucas & Co., Inc. maintains a large research laboratory and a staff of men to study individual finishing problems and recommend the most satisfactory economical solutions.

For further information on our Industrial products or on Chemically Dry Colors, information regarding the development of new products, see your Lucas Salesman, Industrial Department, John Lucas & Co., Inc., 322 Race Street, Philadelphia, Pa.

LUCAS a Great

Name in PAIN

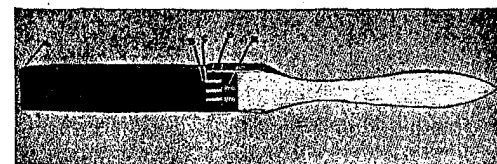

Lucas Tempered Bristle BRUSH

The finest bristle in the world is made even better, better goes into Lucas Brushes. The wild hogs of China produce the best bristle in the world. This bristle, if taken from the hogs in its best. Only winter bristle is used for Lucas Brushes. This bristle is received in the factory, it goes through many tempering operations that reduce its weight by as much as 20 per cent. What remains is Pure China Winter Bristle.

Bristle accounts for 80 per cent of the cost of a good brush. That's why it deserves so much attention. That's why this bristle is so carefully tempered. That's why Lucas Brushes are trade-marked "Tempered Bristle Brushes."

Here is an actual photograph of a Lucas Metal Bound Wall Brush which has been tempered in half. Note the integrity of design and construction that is typical of all Lucas Tempered Bristle Brushes.

A—Flag ends are turned toward the center—a skillful hand-operation that causes brushes to work properly and hold their shape.

B—Narrow wooden dividers.

C—Dividers cause the bristle to taper toward the center.

D—Setting is securely fastened in ferrule of brush.

E—Vulcanized setting comes down deep into ferrule for greater strength.
