Thank you Lynn for joining the Chamber's chemistry solutions discussion today. It was a very valuable discussion and look forward to working with you and your office in the near future!

I am writing on behalf of the Arsenic Science Task Force, an informal organization of arsenic stakeholders whose objective is to ensure that the risk assessment of inorganic arsenic carried out by EPA's Integrated Risk Information System is based on sound science.

Please see the attached letter. We ask that you consider the action we request be granted in accordance with the policies of the Trump Administration.

If you have further questions, please reach out to Seth or Charlie who are CC'd on this email.

Many thanks,

Lucas Joseph
