

January 22, 1940.

Mr. O. B. Lewis,

Dear Oscar:

Upon receipt of copy of Dr. Kehoe's letter to you with comments concerning the use of leaded gasoline in stoves and lamps, Mr. R. W. Hogan re-contacted Major O. B. Cound of the War Department verbally transmitting the information in the foregoing letter.

We feel you might be interested in Major Cound's additional statements in regard to the use of leaded gasoline in the Army's new field stoves.

Yours very truly,

H. C. Dees.
