

February 7, 1980

Memorandum to OSHA File

Bevil Hart called J. L. Wescoat about 8:30 a.m. this date to advise that Commercial Metals Corporation paid their fine for the OSHA violation which was classified by OSHA as serious. He asked if Commercial Metals Corporation was continuing the job even while the strike was in progress. I advised that they were not, and he asked if it was expected that they would resume and indicated that it was mandatory that OSHA conduct a follow-up inspection after a "serious" violation. I told Bevil that if that job was resumed before the conclusion of the strike, I would notify him that it was in progress.

JLW:esh

*I spoke to LEB same date to be sure
to be notified should the T-2/3
demolition resume before the end of
the strike.*

JLW telephoned Bevil Hart 8:15 a.m. April 7, 1980, to advise that since the strike was over, Commercial Metals would be coming in to finish up the demolition work at TCC 2 & 3.
