

1 Q Was that the first time that you did any
2 work at Ford relating to friction materials?

3 A Yes, if you think about friction materials
4 as materials intending to be used for control or
5 slowing things down.

6 Q And you said that was a special project that
7 you did in 1959?

8 A Right.

9 Q Prior to 1959, either for Ford, Chrysler or
10 for anywhere else, have you ever done any work
11 pertaining to asbestos-containing friction materials?

12 A I worked my way through school as a mechanic
13 doing tuneup work, so I had some hands-on experience
14 as far as working as a brake mechanic, but not as an
15 engineer.

16 Q And during what years did you work as a
17 hands-on mechanic?

18 A I believe it is on the CV there, '49 -- I
19 couldn't remember if it was '49 to '50 or '56.

20 MR. SMITH: Page 81, I believe. Line 7.
