

FILE NAME: American Cyanamid (AMCY)

DATE: 1947 Apr

DOC#: AMCY010

DOCUMENT DESCRIPTION: Letter from NYU College of Medicine

In the meantime, we are proceeding with the formation of an Advisory Committee for the Institute of Industrial and Social Medicine. Dean Wetten has invited Dr. Wittmer, Dr. Robert C. Page of the Standard Oil, Dr. Merquhart of The Texas Company and Dr. Washie to form the nucleus of the Committee. We shall be glad to have further suggestions from you. I may say that Dr. Adolph Kanner has left the Shenley Company and is going to South Charleston, West Virginia as Medical Director of the Carbide and Carbon Chemicals Corporation. We are to see Dr. Haddlin, Medical Director of the American Cyanamid Company on Friday, and Dr. Hanson of the American Telephone and Telegraph Company next Monday. I believe Dr. Hanson was on your suggested list for the Advisory Committee, and we shall probably ask him to join it. We are also planning to see the Medical Directors of other companies as soon as appointments can be made.

I shall appreciate any suggestions which you may have from time to time in order to prepare the way for your active participation when the final arrangements for your work with us have been made.

With kindest regards, I am

Yours very sincerely,

*Henry E. Melaney*

Henry E. Melaney, M.D.

San Francisco 20, California

Dear Dr. Lande:

Dean Meppen has told me of Dr. Ecker's reply to Chancellor Chase saying that he looks favorably on having you accept the professorship of Industrial Medicine, perhaps on a part-time basis for the first year. Needless to say I am as pleased as Dean Meppen and the rest of our faculty are at this prospect. Nothing could be more inspiring than your enthusiasm to crown your career with the creation of this important unit in our new Medical Center. I understand that the final arrangements will have to await your return to New York the latter part of May, and we shall be looking forward to your arrival with keen anticipation.
