Hans Weil, M.D.
1430 Tulane Avenue
New Orleans, Louisiana 70112

Dear Doctor Weil:

I am submitting the list of active Marrero Plant employees who have been identified by Leonard Bristol, M.D. on a recent survey of having either Pulmonary Asbestosis Stage I or Mixed Pneumococniosis.

As I indicated to you in our conversation, I am insisting that all of our identified cases be advised of their diagnosis, if this has not already been accomplished. Arrangements to include this in our physical examination program by our local physician, Doctor Gidman, will be made as soon as he recovers from a recent illness, or his staff can assume his function for us.

Will you please advise us of those employees listed, that have given their permission for you to release their findings to the company physician. It would be helpful if you could indicate if any of these employees were among those advised of their diagnosis by you.

It was a pleasure having the opportunity of meeting you and your staff last month and I will appreciate any assistance or suggestions you may have regarding my program for counseling these cases.

Sincerely yours,

T. H. DAVISON, M.D.
