AROCLORS - INDIA

Mr. Paul B. Benignus

H. S. Bergen
D. Danna
J. P. Berndt
S. P. Adarkar (Bombay)
C. L. Sethi (New Delhi)

Attached is a copy of the D(1) form for Aroclor manufacture we propose to submit to the Government of India.

As discussed previously, it is felt that manufacturing Aroclors in India is not in the best interests of India in the face of ecology problems, worldwide overcapacity and only limited demand in India.

This submission of a D(1) on Monsanto's part is principally a move to thwart Indian manufacture by other parties. Monsanto is really saying "We don't think India should encourage the manufacture of these products <u>but</u> if it does then Monsanto wants to be considered".

Please review the D(1) and the draft of the proposed cover letter and let me know if the Business Group wishes to make any additional points. By copy of this letter, I am asking Mike and Chaman to comment if any modifications are required from their standpoint.
