All Mining and Mill Equipment Included in Sale

Mining

The open pit method employing large 4 1/2 cu. yd. shovels, front end loaders, nine large 35 ton trucks. Hard rock drills, one track mounted and one truck mounted, pull dozers, motor graders, back hoe, generators and a great deal of miscellaneous equipment which includes a complete shop with tools and spare parts.

Office

A complete office for the staff and accounting is adjacent to the mill building and this includes a Litton computer used for payroll and other accounting functions.

Processing

A large primary crushing plant, includes a large (48 x 60) jaw crusher, a 5 1/2 foot Symons standard head cone crusher and a huge (FK-250) Hazemag impact crusher coupled with screens and belts. Ore is delivered to the large rotary and verticle dryers via a 1800 foot covered conveyor belt. The mill is a seven story (plus basement) building completely filled with screens, crushers, conveyors of various types, bins, openers, three large pressure breakers and two valve breakers for loose backing. Warehousing is attached to the mill building as are shop facilities and storeroom.
