NEWS RELEASE

API Statement on EPA's Regulatory Agenda

WASHINGTON, March 12, 2025 — American Petroleum Institute President and CEO Mike Sommers issued the following statement after the U.S. Environmental Protection Agency announced plans to reconsider several major rulemakings as part of a broader agenda to support American energy dominance.

"Voters sent a clear message in support of affordable, reliable and secure American energy, and the Trump administration is answering the call by moving forward on many of the priorities in [API's five-point policy roadmap](#). As this regulatory process moves forward, we are committed to working with Secretary Zeldin on commonsense policies that advance American energy dominance."

API's [five-point policy roadmap](#) and [EPA policy memo](#) noted the importance of many of these regulatory actions to secure American energy leadership and protect consumer choice.<

API represents all segments of America's natural gas and oil industry, which supports nearly 11 million U.S. jobs and is backed by a growing grassroots movement of millions of Americans. Our approximately 600 members produce, process and distribute the majority of the nation's energy, and participate in [API Energy Excellence®](#), which is accelerating environmental and safety progress by fostering new technologies and transparent reporting. API was formed in 1919 as a standards-setting organization and has developed more than 800 standards to enhance operational and environmental safety, efficiency and sustainability.
