Hi Jon—

On background:

<https://www.epa.gov/national-aquatic-resource-surveys>

The National Aquatic Resource Surveys (NARS) are collaborative programs between EPA, states, and tribes designed to assess the quality of the nation's coastal waters, lakes and reservoirs, rivers and streams, and wetlands using a statistical survey design. The NARS provide critical, groundbreaking, and nationally-consistent data on the nation's waters.

**NARS Fact Sheet:**

**Subject:** PolitiFact seeks latest water quality data

Hi Tricia -

I'm seeking the latest national summary on water quality. So far, I've found state level assessments for watersheds, and some surface water reports through 2012.

Can you send me links to the most current reports?

Thanks very much.

Jon Greenberg
