**SULPHUR DIOXIDE
SO₂**

Sulphur Dioxide is effectively used
in water treatment to remove objec-
tionable odors remaining after puri-
fication.

COPPER SULPHATE will control
about 90% of the micro-organisms nor-
mally encountered in water treatment
plants more economically than any other
chemical. Very effective for taste and
odor control.

AIR - TESTED
MALLEABLE IRON
UNIONS**

Here's a quality product... one you can
depend on for even the toughest jobs...
a union fabricated of Air Furnace Mal-
leable Iron, with sound, uniform seat ring
cut from seamless drawn brass tubing,
instead of cast brass seat rings.

To use Jefferson Unions means that you'll
get the maximum in carefree service...
service that is insured before shipment by
Jefferson's rigid air tests and inspection...
service that is further insured by the
use of malleable iron having an average
tensile strength of 55,000 p.s.i.

The difference in performance of Jef-
ferson Unions more than offsets a slightly
higher price.

The Jefferson line includes AAB male
and female unions, Enduro 3002, Exco,
2502 and Master 1502 Unions. All-line
seats are also available in all types.
