

THE PLANT BEHIND THE PRODUCT

Whatever you specify in homogeneous lead-lined or lead-covered equipment . . . from the largest drum to the smaller coils . . . it is important to know that we have the plant facilities and the manufacturing experience to handle the job promptly and efficiently.

And remember, too, that our process assures *perfect bonding* between the lead and the other metal. There is no crawling . . . no buckling . . . no separation under vacuum, under pressure or under temperature variations close to the actual melting point of lead. Each unit is thoroughly tested before shipment.

United

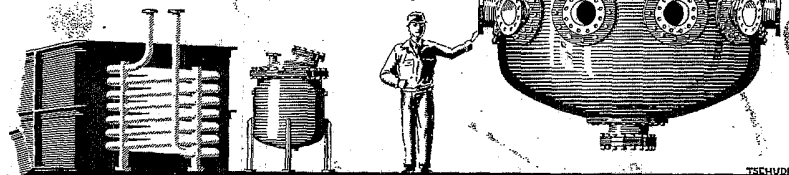

Products

We also manufacture a complete line of chemical lead-lined pipe, fittings, valves, coils and tank connections, as well as Hardlead acid pumps, fittings, valves, cocks and lead-covered copper pipe for steam pressure.

VISIT BOOTH 206

We shall be glad to welcome you in our booth at the Exposition of Chemical Industries, Grand Central Palace, December 2-7.
