

Dear Paul;

I thought you might be interested in what is happening here.

Gregory Ferguson, our attorney, and friend is working all alone preparing a court case against these jerks. He needs some help desperately even if it is just someone he could consult with and get opinions from. He is working with Pat Costner. She is our angle of mercy as you will see when you read this stuff.

The States Att Generals Office has filed suit against Dow, and the DOD in the Veetac case. If they are found to be PRPs Charlie Molton the attorney for the AG's office said there will be a lot of money available for class action law suits. There are a bunch of people here who sure would like to file a suit against them.

Please if you could give Greg some help or advice give him a call.
