"Century Fluid-Tite Pipe"
Bulletin 2601-9 -- April 13, 1956

With reference to my Merchandise Bulletin dated April 13, 1956, concerning the above subject, the second paragraph should read as outlined below. Please note that the word "normal" should have been "nominal."

"We are informed that they will continue to consider their standard for the 10" and 12" sizes as being the 'nominal' diameter since they continue to have no facilities for manufacturing full diameter 10" and 12" pipe with any type of coupling except at the Santa Clara, California plant."
