February 16, 1971

Mr. DeWitt Huffman, Chief
Engineering and Hygiene
Division of Safety and Hygiene
Industrial Commission of Ohio
700 West Third Street
Columbus, Ohio 43212

Dear DeWitt:

The following is a report of an analytical evaluation of filter paper collected air samples analyzed for Fe_2O_3:

Collected at: Baldwin-Lima-Hamilton Corp., Lima Division

CLARK EQUIPMENT COMPANY LIMA DIVISION

Collected by: Maurice E. Hatton, P. E.

Type of Contaminant: "Iron dust"

Date forwarded: November 27, 1970

Results are as follows:

Sample #	Duration Minutes	Volume liters	Fe_2O_3/Sample Milligrams	$Mg Fe_2O_3/M^3$ a.r
1	15	150	1.39	9.3
2	15	155	0.236	1.53

I hope the delay in getting this report out has not created any inconvenience to you or Mr. Hatton.

18

Mr. DeWitt, Huggman, Chief
Industrial Commission of Ohio

February 16, 1971

As you already know, I am phasing out the laboratory, and your samples were part of a backlog created when I lost my laboratory assistant.

Best regards, and I hope to see you soon after I get established in my new position with the URW.

Yours very truly,

Louis S. Beliczky
Director of Industrial Hygiene

Department of Industrial
Medicine and Hygiene
