Dr. Robert Kehoe
Kettering Laboratories
University of Cincinnati
School of Medicine
Cincinnati, Ohio

Dear Dr. Kehoe,

I recently spoke to Dr. Silverman about the problem of lead toxicity and he suggested we contact you. Specifically, we are interested in the toxicity of lead chromate, sulfate, carbonate, lead oxide and their mixed salts. We would appreciate any references you may be able to provide on these materials along with copies of any papers you have available on data obtained in your laboratories.

Very truly yours,

Sam Battista
