Robert A. Kehoe, M.D.
Kettering Laboratories
Cincinnati 19, Ohio

Dear Dr. Kehoe:

One of our physician friends has asked us what is the highest blood lead level ever recorded. He recently had a child who ate a hole through a plaster wall and convulsed for 2 days. The blood lead measured 0.703, and he thinks this may be a record.

Do you have any data available on this?

Sincerely yours,

J. S. Lerner
