Cathy,

Yes, they can be done, however, not until Wednesday as I am on my way out the door to Front Royal.

Glad things went well. I see the meeting is taking place on March 11 @ 1PM. If that is true, I may be able to make a 1 day round trip.

Regards,

Charlie Z.

Subject: C8 meeting

Charlie,

I reviewed the draft presentation (attached in last email) with the business crowd, at a hideous 7:30 this morning. It went well, although they wanted to see 2 more things (naturally).

- They asked me if we can highlight the contoured area on the map for concentrations greater than or equal to 0.3 ug/m3 for each of the three cases.
- Also is it possible to go back into Debbie's actual 2002 runs and ask ISC to find the highest concentration in Ohio for that run? (I estimated 0.8 to 0.9, but they wanted an exact number for comparison.)

Let me know if any of this is big trouble for you.

Many thanks

-C
