**Subject:** Re: Pesticides on tobacco

Good afternoon, Tate:

I was wondering if the EPA has a list of pesticides that are prohibited for use on tobacco crops? I know you sent me the federally-registered product that can be used on tobacco at some stage in its production, but was wondering if there is a list of prohibited pesticides. Or would any pesticide not on the list you sent me be prohibited?

Please let me know.

Thanks,

Cassie-

Thanks to Rick, the attached file lists every federally-registered product that can be used on tobacco at some stage in its production, including those uses where tobacco might be treated post-harvest while it is in storage.

Please note that this list should not be used as a substitute for a pesticide user to consult the label for specific directions on how to use the product. Not all of these products will necessarily be available for use in the State of Maryland. EPA does not maintain information regarding which products are registered in which states. The state lead agency for pesticide regulation would be the best source for that information.

Hope this helps.
