Anna, for attribution to “an EPA spokesperson,” please:

The Agency is currently considering the comments received in response to the 2016 proposals, including comments suggesting that EPA quickly finalize these actions and comments suggesting that these actions be evaluated as part of the group of the first ten chemicals undergoing initial risk evaluations under the Lautenberg amendments to TSCA.

Cheers, R.

Hi Robert,

Thanks for your time. I just want to see if there’s any update today on the status of the proposed ban on methylene chloride.

We know it has been in a postponed/hold status as of December, when it was moved into “long term actions” - just want to know if there’s an update or an anticipated next action date.

**Our deadline for tonight’s story is 5 pm Eastern.**

Here's the piece I referenced featuring recent and past deaths from methylene chloride:

<https://www.cbsnews.com/news/dangerous-paint-stripper-chemical-methylene-chloride-ban-on-hold/>

Thanks very much for your help.

Best,  
Anna Werner
