College of Medicine
Eden Avenue
Cincinnati, Ohio

My dear Willard:

You have doubtless received from Dr. Calingaert various memoranda relating to the use of leaded gasoline in the special stoves developed by the Quartermaster Department of the U. S. Army.

I will appreciate very much an opinion from you as to whether we need to go further into this matter or not as the question is being brought up from time to time from various sources.

Very truly yours,

Graham Edgar
