BROOKLYN 1, N.Y.

ALEX. STEWART
DIRECTOR OF RESEARCH

October 6, 1947.

Dr. Robert A. Kehoe, Director,
Institute of Industrial Health,
Cincinnati, Ohio.

Dear Dr. Kehoe:

Some time ago when I was in Cincinnati I talked with your secretary about the possibility of developing a program of study in connection with the toxicity of paint films. However, due to one delay or another I have not been able to write you sooner.

I wonder if you could undertake a study covering the relative toxicity of paint films. In addition to this, we now have the possibility of paints containing DDT or similar insecticides. We do have a general program of study planned which we should like to talk over with you.

In addition to our program, we should like to learn a little more about the new Institute of Industrial Health program which you are creating. In this connection we should be pleased to finance a fellowship and if you will let us know something about the cost, I should be pleased to present it to our people for approval.

At your convenience, we are looking forward to meeting with you.

Yours very truly,

Alex. Stewart
