Re: Mr. E. J. Sinclair
Mr. E. M. Grab

Dear Doctor Jacobson:

You will recall having seen x-rays on Mr. E. J. Sinclair and Mr. E. M. Grab, who are employees at a Union Carbide asbestos mill at King City, California. Your report to me dated May 8, 1974, indicated that on the basis of the roentgenograms I had sent you there were no changes indicative of asbestosis or obstructive airway disease in either case.

I have just been informed that an x-ray taken recently on Mr. Sinclair has been diagnosed as asbestosis by the roentgenologist at the George L. Mee Memorial Hospital in King City. He also stated that he had not yet received the x-rays from your office.

Therefore, I have asked that the new roentgenogram on Mr. Sinclair be sent to you and am requesting that you review it and send your report and the bill to me. Also, may I ask that your office check to see that the new film as well as the old films are returned to the George L. Mee Memorial Hospital in King City.

Thank you for your assistance in this matter.

Very truly yours,

John J. Walsh, M.D.
Corporate Medical Director
