Painting Sprayolite

May 2, 1958
Savannah, Ga.

cc: J. J. Fitzsimmons

To the best of my knowledge we have not been successful on a single job of painting sprayolite.

As you recall we had a tremendous amount of trouble trying to paint a job in Joe Little's territory. They applied numerous coats of paint using our specifications as well as other methods and as I recall they were only successful when they finally applied a thin coat of sprayolite.

Personally I think we should take painting out of the specifications and recommend another thin coat of sprayolite where the ceilings need redecorating.

However, I will check further and if I come up with anything I'll keep you informed.
