

OMB Stay of Portions of the New Asbestos Standards

The following provisions of the new asbestos standards which contain information collection requirements are stayed pending review by the Office of Management and Budget:

29 CFR 1910.1001, as amended June 20, 1986;

- (d)(2) initial monitoring
- (d)(3) monitoring frequency (periodic monitoring) and patterns
- (d)(5) additional monitoring
- (d)(7) employee notification of monitoring results
- (f)(2) compliance program
- (g)(3)(i) respirator program
- (j)(5) employee information and training
- (l) medical surveillance
- (m) recordkeeping

29 CFR 1926.58;

- (f)(2) initial monitoring
- (f)(3) periodic monitoring within the regulated areas
- (f)(6) employee notification of monitoring results
- (h)(3)(i) respirator program
- (k)(3) employee information and training
- (k)(4) access to training materials
- (m) medical surveillance
- (n) recordkeeping

It is anticipated that OMB will complete their review of the standards shortly. In the interim, the parallel requirements of the asbestos standard issued in June 1972, as amended, and published in 29 CFR 1910.1001 will remain in effect.
