Mr. Jack T. Garrett
Manager, Industrial Hygiene
Monsanto Company
800 N. Lindbergh Boulevard
St. Louis, Missouri 63166

Dear Mr. Garrett:

In the past you have kindly supplied us with samples of Aroclor 1254. I'm sending a copy of a manuscript accepted for the next April issue of The Journal of Wildlife Management. It contains some of the results of our research on the effect of this compound on the ring-necked pheasant. As other results become available, I'll pass them along to you.

Sincerely,

Robert B. Dahlgren
Assistant Leader
