

INTRACTABLE
RESINS

MONSANTO
PLASTICIZERS

WORKABLE NEW
FORMULATIONS

This simple formula works on even your toughest plasticizing problems. It figures. Who else but Monsanto can throw more than 80 plasticizers at a recalcitrant resin?

TAKE

EPOXY

RESINS...

Mod-Epor® reduces viscosity and accelerates cure of epoxy resins. It maintains or improves electrical and physical properties...at 50% to 65% lower total cost than other reactive diluents. *Aroclor*® compounds yield self-extinguishing or non-burning formulations and also reduce costs.

To formulate your plasticizing problems away, contact Monsanto first.

Technical Bulletin PL-332, *Plasticizers for Hard-to-Plasticize Resins*, reviews applications of Monsanto plasticizers in 21 difficult resins. Return the coupon today to get your copy. Monsanto Chemical Company, Organic Chemicals Division, Dept. 244, St. Louis 66, Missouri.
