Tylenol.

Q That is as a result of the original operation back in 1980, isn't it, Doctor?

A That is correct.

Q As time progressed, in September of 1981, what is this drug that Mr. Vandergucht was given?

A Demerol is a narcotic given 75 milligrams with Vistaril which is an additional drug which proteinates the Demerol and also is an antinausea factor.

Q Would this have been for pain, Doctor?

A Yes.

Q In addition to that, Doctor, September 8th of 1981, what drug are we looking at here?

A This is morphine sulfate, again, for pain, 5 to 10 milligrams.

Q Again, Doctor, September of '81, what drug are we looking at here?

A Again, codeine which is for pain, 30 to 60 milligrams by mouth.

Q In addition, you mentioned that there was
