ASBESTOS - MEDICAL SURVEILLANCE

Regarding your question on medical surveillance for employees engaged in jobs where there is exposure to airborne concentrations of asbestos, Dr. J. Foderaro, Corporate Medical advises:

"Medical Surveillance should consist of a
pre-employment and annual examination which
should include

- o Medical history*
- o Examination by or under the supervision of a physician
- o SMA-12 and CBC
- o Urinalysis
- o 14x17 AP Xray of the chest*
- o Vision test
- o Audiogram as indicated
- o Electrocardiogram at age 35, 40, every three years until age 50 and annually thereafter
- o FEV₁, and FVC**

*Required by OSHA
