Subject: Re: Water Online Interview Request: Promoting Preparedness to Protect a Town's Drinking Water

I am on it, Peter. And there is no such thing as bombarding.

On Aug 4, 2017, at 12:04 PM, Peter Chawaga <pchawaga@vertmarkets.com> wrote:

Hi Enesta,

I know I am bombarding you, but this is my last request for the month.

We'd like to do a story on a recent EPA Webinar, "Promoting Preparedness to Protect a Town's Drinking Water" (it was on July 19 and I believe based on [this report](#)).

I am hoping that you or a party you recommend, maybe Jeri Weiss, can provide written answers to the questions below. I'd like these by August 11, but understand if I have made too many requests for that to be possible.

Thanks,

Peter

1. Is it possible to share any slides or recordings on the webinar?
2. Why is it important for communities across the country to be aware of the impact that extreme weather can have on drinking water quality?
3. How did the EPA establish a relationship with Mattapoisett that allowed for the sharing of its lessons through this webinar?
4. What types of extreme weather events has Mattapoisett experience and how have these affected drinking water sources?
5. How has the town bounced back to better protect its drinking water quality in the future?
6. Can you share a handful of best practices (four or five) developed out of Mattapoisett's experiences that you would recommend other communities adopt?
